The all-new EV6

22062022V11

Movement that inspires

The most inspiring thing we can create is an emotion.

The journey is not just about getting from one location to another. It's about creating an experience, an emotion that inspires you to create ideas. The Kia EV6 is created to deliver not only comfort, style and utility, but also emotion.

Bold exterior Sleek & sporty aerodynamics design of the EV6 is stylish as is functional.

Curved LED tail lights The full LED tail lights in a distinctive curved shape adds a sporty and futuristic look to the EV6.

KCV 0330

Relaxation as a design objective.

With a flat floor and a broad shouldered frame, the Kia EV6 gave our designers more freedom to create the best design for you. The seats take up less space, but deliver more. The zero gravity Relaxion comfort seats ensure that your body is in its most comfortable position, minimizing fatigue or discomfort you may have experienced with conventional seats, especially on long drives.

The Kia EV6 gives you more space and more comfort. Because when you are more relaxed, inspiration flows.

Relaxion comfort seats

The front seats are both slimmer and stronger than those found in other vehicles. They also offer more adjustability. While you charge the Kia EV6, the relaxion comfort seats let you recline to a nearly horizontal position. The seats are designed to relieve pressure on your hips and lower back.

Smart power tailgate

The hands-free smart power tailgate can be set to open to a desired height using the vehicle settings controls. Stand behind the parked Kia EV6 for few seconds with the key nearby, and the tailgate will open automatically.

Remote 2nd-row seatback folding Pull the remote release lever on the wall of the cargo space to fold the rear seatback down, creating up to 1300L of storage capacity.

An immersive journey for everyone.

The curved dual panoramic 12.3-inch screens provide a stunning and immersive experience. Over 24-inch of combined display for navigation, convenience, entertainment, and vehicle information features. The Meridian premium sound system is designed to bring an impressive listening experience to every seat.

Panoramic curved display The intergrated curved display offers a truly immersive experience. Its wide and expansive design provides clear, unobstructed visibility.

Meridian premium sound system

Meridian, a premier audio brand and partner to Kia, developed the 14-speaker system especially for the unique acoustics of the Kia EV6. A powerful external amplifier boosts output.

Wireless charging tray

The charging pad in the front center console bin lets you charge compatible portable phones wirelessly. It operates with up to 15W of power, so charging is reassuringly fast.

Infotainment / climate switchable controller

With the capacitive touch screen located on the centre fascia, you can easily switch between media and the climate control displays with the touch of a button.

Reinventing how we move.

This vehicle is perfectly suited to today's active lifestyle. It's efficient, full of innovative technology and takes you from adventure to adventure.

Electric-Global Modular Platform (E-GMP) The Kia EV6 is the first vehicle based on the Kia E-GMP platform. The new long-wheelbase platform is a clean slate. It introduces a flat floor, facilitating new comfort and utility choices. Its modularization permits more flexible development to secure performance, maintenance, and safety objectives. Performance benefits include greater power, driving range, and control, as well as shorter charging times.

Charging port The Kia EV6 is fitted with the Type 2 charging standard that incorporates a combined AC (Type 2) and DC (CCS2) inlet.

Vehicle-to-Load (V2L)

Get 220V of AC current to power your devices, inside or outside the Kia EV6. Fully charged, its vehicle-to-load feature offers 3.6kW of power, enough to power lifestyle accessories. Inside the Kia EV6, just select EV Ready or Utility mode and use the outlet at the base of the rear seat. For the outside, simply attach the V2L connector to the charging outlet.

In control of your drive.

Experience a truly unique driving experience. Everything about the EV6 is designed to help you to manage your journey. Select the best driving mode to suit your journey or turn your braking into energy regenerative mode. All these to make sure you continue to enjoy every moment of your drive.

Shift-By-Wire (SBW) Change gear position simply by turning the dial with the space-saving Shift-By-Wire selector which is conveniently placed alongside the EV6's starter button on the centre console.

Drive Mode Select

The Kia EV6 can adjust to the way you like to drive. Choose Normal, Sport or Eco drive mode using steering wheel or voice controls. Sport lets you accelerate more quickly, while Eco saves energy to extend your driving range. Each mode has a theme display on the cluster screen that switches from white to black at night.

Smart regenerative braking system Smart Regenerative Braking automatically adjusts the regenerative braking based on forward traffic flow, harnessing braking energy to improve driving range & efficiency.

Always Prepared.

Kia applies the latest Advanced Driver Assistance System (ADAS) technologies to help ensure the ultimate in occupant and pedestrian safety.

Surround View Monitor (SVM) When maneuvering in confined spaces, multiple cameras give you a zoomable, 360° overhead view around the vehicle, so you can steer and park with confidence.

Rear Occupant Alert (ROA) Designed to alert drivers to check if a child is left behind in the rear seat of a vehicle.

Safe Exit Assist (SEA) When the occupant opens the door to exit the vehicle after a stop, a warning sounds if an approaching vehicle from the rear side is detected. The function also helps keep the rear door closed with the electronic child lock.

Blind-Spot Collision-Avoidance Assist (BCA)

The system helps prevent or reduce the risk of collision with vehicles in the adjacent lane or coming from behind when the driver switches lanes through audio-visual alerts and steering feedback.

Rear Cross-Traffic Collision-Avoidance Assist (RCCA)

If there is a risk of collision with an oncoming vehicle on the left or right side while reversing, RCCA provides a warning. After the warning, if the risk of collision increases, RCCA automatically assists with emergency braking.

Lane Keeping Assist (LKA) Alerts you when your vehicle is about to move from its intended lane and provide steering intervention if needed.

Blind-Spot View Monitor (BVM) Projects live video view of adjacent lanes in the instrument cluster when activated via the turn signal.

Smart Cruise Control (SCC) Smart Cruise Control helps the driver maintain distance from the vehicle ahead and drive at a cruising speed set by the driver. The vehicle automatically stops and starts if the vehicle in front moves ahead within a short period of time.

Lane Following Assist (LFA)

Assist the driver's steering to help keep the vehicle centered between the lanes by detecting lanes and vehicles ahead on the road.

Forward Collision-Avoidance Assist (FCA)

FCA uses a front-view camera and radar to detect a vehicle, pedestrian or cyclist ahead. By warning and braking automatically, it can help you avoid, or reduce the severity of, an accident. The system also engages if you are crossing or turning at a junction.
